

Development Work Summary

Reporting period: 4 August 2026 – 1 September 2026 (30 days) · Prepared by: Rezaul Karim

28 COMMITTS	3 NEW MODULES	4 DB MIGRATIONS	3,409 LINES ADDED	318 LINES REMOVED
----------------	------------------	--------------------	----------------------	----------------------

A. New Modules & Major Features

1. Mushak 6.3 VAT Invoice Module — 4 Aug & 21 Aug 2026

- **Phase 1 — Generation:** Generate statutory Mushak 6.3 VAT invoice directly from sales invoices. Includes dedicated receipt template, PDF download route, government seal graphic, NBR-compliant statutory layout and authorised signatory configuration.
- **Phase 2 — Editable Management:** Full CRUD module with dedicated invoice record storage, list / create / edit screens, sidebar menu integration, and automatic field pre-fill from the linked sales transaction.

~1,300 lines · 1 new database table · new controller, model and 5 new screens

2. Investor Portal with Secure Login — 31 Aug 2026

- Separate investor login with a dedicated dashboard layout, access-scoped so each investor sees only their own records.
- Summary tiles: Total Invested, Total Principal Paid, Total Paid with Profit, Total Profit, Total Invest Due.
- Detailed investment list with payment status, remarks and loan duration.
- Investor profile fields added (phone, address, emergency contact) plus investor-to-user account linking.

832 lines · 2 database migrations · new controller, security middleware and 2 new screens

3. Due Payment Received Report — 16 Aug 2026

- New report presenting due payments received with a payment-method-wise summary.
- Dedicated access permission so visibility can be controlled per role; integrated into sidebar and role create/edit screens.

556 lines · 1 database migration (permission) · new report screen

B. Feature Enhancements

4. Multi-select Expense Sub-categories & Authorised Person Fields — 27 Aug 2026

- Expense sub-categories upgraded from single to multiple selection across create, edit and list screens.
- Authorised person fields added to Mushak forms and wired through Sales, Purchase, Expense and POS modules.

247 lines · 19 files · 1 database migration

5. Sales Filter & Product Quick-Add Improvements — 21 Aug 2026

- Enhanced filtering on the sales listing and a streamlined quick-add product flow from the sales screen.

185 lines · 8 files

6. Transaction Time & Business Name Columns — 27 Aug 2026

- Time-of-transaction column added to Sales, Expense and Purchase tables (previously date only).
- Business name column added to the sales listing for clearer multi-business detail.

9 files across controllers, views and scripts

7. Investor Dashboard Refinements — 1 September 2026

- Sequential serial numbering (1...N ordered by received date) replacing raw database record IDs.
- Entries-per-page now follows the configured business setting (100) instead of defaulting to 10.

C. Fixes & Layout Corrections

8. Bill Due Report — Three Crash Fixes — 16 Aug 2026

- Report was returning server errors and failing to load. Three distinct root causes diagnosed and resolved: an unresolvable route reference, an unrendered payment-status object, and malformed currency formatting.

9. Mushak 6.3 Print & Layout Corrections — 4 & 27 Aug 2026

- Iterative print-accuracy work to match the statutory form: item column widths, seller block width and margin, font sizes and line heights, authorisation section alignment, and removal of blank invoice rows.

10 commits of successive refinement against the official Mushak 6.3 format

10. Download Chalan Receipt Formatting — 20 Aug 2026

- Product table layout and description formatting improved on the chalan receipt (99 lines).

11. Deployment Database Configuration Fix — 7 Aug 2026

- Railway hosting database configuration corrected.

D. Consolidated Billing Summary

#	Work Item	Category	Scale
1	Mushak 6.3 VAT Invoice Module (generation + editable management)	New Module	Large
2	Investor Portal with scoped login & dashboard	New Module	Large
3	Due Payment Received Report (with role permissions)	New Report	Medium
4	Multi-select expense sub-categories + authorised person	Enhancement	Medium
5	Sales filter & product quick-add improvements	Enhancement	Medium
6	Transaction time & business name columns	Enhancement	Small
7	Investor dashboard serial no. & page size	Enhancement	Small
8	Bill Due Report crash fixes (3 separate issues)	Bug Fix	Small
9	Mushak & Chalan print layout corrections	Bug Fix	Medium
10	Deployment configuration fix	Maintenance	Small

Notes. This summary is compiled from the project version-control history for the stated period. Work not recorded in version control — client meetings, on-site support, data corrections and testing rounds — is not reflected here and should be billed separately. Item 9 groups ten successive layout commits into a single line item, as they represent one continuous body of print-accuracy work against the statutory Mushak 6.3 form. Item 11 is infrastructure maintenance rather than client-facing feature work.
